Muhamed Roshdy Al-Abd

Senior Mobile Developer | Native Android & Flutter | Mobile Team Lead

Cairo, Egypt
Phone: +201061071897
Email: en.muhamed.roshdy@gmail.com | LinkedIn

Professional Summary

Results-driven Senior Android Developer and Mobile Team Lead with over 7 years of hands-on experience specializing in Native Android (Kotlin/Java) and Cross-Platform Flutter ecosystems. Proven track record of leading technical teams and delivering 60+ production applications with 100K+ combined downloads across E-Commerce, Fintech, POS, and On-Demand Logistics sectors. Expert in Clean Architecture, Multi-Module Systems, MVVM/MVI, Jetpack Compose, and Coroutines. Demonstrated ability to modernize legacy codebases, reduce crash rates by 60%, and improve app loading speeds by up to 40%.

Technical Skills

- **Languages:** Kotlin, Java, Dart, Swift
- **Android & UI:** Android SDK, Jetpack Compose, XML, Custom Views, Material Design, Multi-Module Architecture
- **Architecture & Patterns:** Clean Architecture, MVVM, MVI, MVP, SOLID Principles, Design Patterns
- **Async & State Management:** Coroutines, Kotlin Flows (StateFlow, SharedFlow), RxJava, BLoC/Cubit, GetX, Provider
- **Dependency Injection & Jetpack:** Dagger-Hilt, Koin, Navigation Component, WorkManager, Room, SQLite, Paging 3, DataStore
- **Networking & Services:** Retrofit, OkHttp, Ktor, Dio, RESTful APIs, Firebase (FCM, Firestore, Crashlytics), Google Maps/Location APIs, OAuth
- **Testing, Quality & Tools:** Unit Testing (JUnit, MockK), Espresso, Integration Testing, CI/CD Pipelines, Git, GitHub, ProGuard/R8, Agile/Scrum
- **Specialized Integrations:** Payment Gateways, In-App Purchases/Subscriptions, Hardware Integration (Bluetooth Thermal Printers, Barcode Scanners, POS)

Professional Experience

- **Mobile Team Lead & Senior Android Developer | Business Building** — November 2024 – Present
- **Technical Leadership:** Spearheaded and managed a cross-functional mobile engineering team (Android & iOS), establishing strict code review guidelines, CI/CD workflows, and modern development standards while remaining actively hands-on.

- **End-to-End Product Delivery:** Architected and deployed complex dual-application ecosystems (such as the Final Rental & Delivery platform) using Clean Architecture and MVVM/MVI patterns to ensure modularity and scalability.
- **Code Modernization:** Directed the technical migration of legacy features into modern Android Jetpack Components, Jetpack Compose, and Kotlin Coroutines/Flows, reducing technical debt and improving maintainability.
- **Cross-Functional Collaboration:** Partnered closely with product managers and UI/UX designers to define feature roadmaps and accelerate time-to-market for major releases.
- **Senior Mobile Developer (Flutter & Android) | Modern Charm – KSA** — December 2022 – August 2024
- Engineered high-performance mobile applications tailored for the GCC market, utilizing Kotlin for native Android platform channels and SDK integrations alongside Flutter and Dart.
- Implemented reactive state management using BLoC and GetX, resulting in predictable application states and a 30% reduction in state-related bugs.
- Integrated complex RESTful APIs, real-time Firebase services, and secure regional payment gateways.
- Mentored 5+ junior and mid-level developers, conducting regular code reviews that elevated overall team code quality.

Android Developer | Albadr Smart Systems — April 2017 – December 2022

- Designed, developed, and maintained 25+ native Android applications using Kotlin and Java, focusing on enterprise stability and fluid Material Design interfaces.
- Built and deployed advanced POS & Inventory Systems featuring hardware barcode scanning, Bluetooth thermal printer integration, offline local persistence (Room, SQLite), and real-time synchronization.
- Integrated secure payment gateways, in-app purchases, and subscription models, directly driving client revenue growth.

Key Technical Achievements

- **Crash & Quality Optimization:** Reduced application crash rates by 60% across production apps through comprehensive unit/UI testing, memory leak resolution, and defensive programming.
- **Performance Enhancement:** Achieved a 40% improvement in app startup and rendering times through architectural refactoring and background thread optimization.
- **Legacy Modernization:** Successfully led the complete migration of 10+ legacy Java applications into modern, reactive Kotlin codebases.
- **Market Impact & Leadership:** Delivered 60+ applications (30+ directly published on Google Play & App Store) reaching 100K+ combined downloads, while mentoring 5+ junior developers.

Highlighted Projects

- **Final Ecosystem – Equipment Rental & Express Delivery (Business Building):** Dual-application platform serving the Saudi market. Built the Final Client App for renting professional photography gear with flexible daily/weekly/monthly billing and equipment exchange workflows, alongside the FPE Driver App featuring real-time delivery/return tracking, driver analytics, and instant in-app chat.
- **Al-Badr POS & Dana Bakery (Enterprise Native Android):** Point of Sale and bakery management systems built with Native Android (Kotlin, Room, SQLite), featuring offline-first architecture, inventory management, hardware barcode scanning, and Bluetooth thermal printer integration (Google Play).
- **Shine Laundries & WaterDrop (On-Demand Delivery Ecosystems):** Integrated laundry and water delivery platforms featuring dual interfaces (Client & Driver apps), real-time GPS order tracking, and automated dispatch workflows.
- **Treatab & SalonTech (Beauty & Booking Platforms):** High-traffic booking platforms with dual-user interfaces (Clients & Specialists), scheduling engines, exclusive commercial discounts, and secure GCC payment integrations.
- **Location-Based Marketplaces & Social Apps (Muntj.com, Plorer, Watch2Buy):** Commercial marketplaces and social platforms utilizing advanced Google Maps APIs, real-time messaging, media sharing, and location-based filtering.
- **Additional Production Portfolio (50+ Apps):** Successfully delivered diverse apps across Fintech & Digital Cards (Pytic, Card Net), Food & E-Commerce (City Hyper, Belques, Lahmetak Lbetak), and AI & Publishing (Helm AI, BookCloud). (Full links portfolio available upon request).

Education & Languages

- **Bachelor's Degree in Social Service** – Delta Academy, Mansoura (2011)
- **Continuous Technical Training:** Advanced Native Android Architecture (Kotlin/Jetpack), Software Architecture & Design Patterns, Complete Flutter & Dart Development.

Languages: Arabic (Native), English (Professional Working Proficiency).
